The immediate result was that when, the maintopmen returned to the ship, Paul was not among them. At first was surmised that he had been robbed and murdered, as the officers averred, one and all, that he would never be a voluntary deserter.

Mormon Land Monopoly.

The Territory of Utah is divided into two nearly equal parts by the Wasatch Mountains. On the east of these mountains lies the Uintah Indian reservation, larger than Connecticut and Rhode Island, and the territory is bounded almost entirely on the east by the Ute reservation in the State of Colorado. Because of the location of these reservations, agricultural settlements cannot be expected to exist in Utah east of the asatch range for many years, for farmers settled there would live in constant fear of Indian incursions. The farming settlements of Utah are, therefore, conined to the foothills and valleys on the west side of the mountains, where the land is irrigated, without the use of capital, by the mountain streams, which are fed by the snows which lie on the heights. Not more than one-fiftieth of the land in Utah can now be irrigated in this way for lack of natural streams, and water cannot be supplied for the remainder until the sinking of artesian wells for this purpose has proved successful and much money has been expended in building long irrigating canals. But experience shows that the now barran lands of Utah will become wonderfully productive wherever water

can be brought to them. Wherever the land could be irrigated by natural streams, and could, thereore, be used for agricultural purposes, the thrifty Mormous ingeniously secured it against appropriation by any persons except those of their own faith. Little olonies of from 200 to 500 persons were systematically arranged along the western side of the Wasatch Mountains, and these colonies were incorporated as citles by the Territorial Legislature of Utah. When Congress threw open the public lands to settlement under the Pre emption law, in 1841, and the Homestead lands within the limits of an incorporaor town, could not be taken by farmers. In order to control the farming lands in Utah, the Mormons blanketed with a a time, spending forty-eight hours in All his liveliness forsook him; he ate series of incorporated cities almost the pense. To eat a Scotch breakfast, for example, one requires to have passed some time in mountainous air and active exercise. Given these conditions, the porridge, the Finnan haddocks, the omelettes, the ham, the trout, the cold grouse, the marmalade, the hot "scones," the strawberries and cream, the tea and what could have induced you to run coffee, and the rest, are all that a frugal taste can desire.
